

REMARKS

A Restriction Requirement was mailed on December 21, 2007 in which the Examiner stated that claims pending in the application are directed to two patentably distinct inventions: Invention I (claims 13 through 26, drawn to generation and display of internet content, classified in class 715, subclass 526) and Invention II (claims 27 through 32, drawn to integrating data structures into a bundle for transmission to a client, classified in class 709, subclass 203).

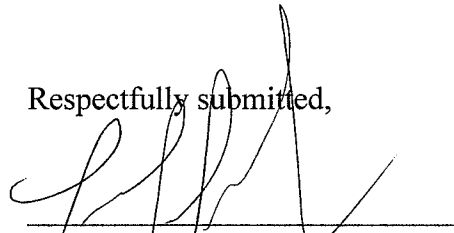

In Response, Applicants hereby elect Invention II. Applicants believe that claims 27 through 32 are readable on the elected Invention.

In view of Applicants' election, an early and favorable action on the merits is earnestly solicited. To expedite prosecution of this application to allowance, the Examiner is invited to call the Applicants' undersigned representative to discuss any issues relating to this application.

Date: February 28, 2008

THIS CORRESPONDENCE IS BEING
